

## Increase of Guest Service Level with Touch Screen Information System

*Hotel reception has to deal with a lot of guest's requests for information. Most of requests are common: call taxi, find nearest banks, tourist attractions, restaurant, check for available services. And also it has issues with multi-language guests and information visualization.*

Our solution – **Interactive Information System.**

There are 3 components: HARDWARE, SOFTWARE and CONTENT. We supply all of them or you can order only software and run it at any PC with Microsoft Windows.

iSSimple iNO SOFTWARE is flexible user interface (adapted for touch screen) and content aggregation tool. You can manage content locally or remotely from Internet. Even you can connect web-content sources like Twitter, RSS feeds, YouTube or Flickr streams.

For HARDWARE we propose cost effective thin All-in-One touch screen PC.

### **All-In-One PC**

7" 10" 13" 15" 17" 19" 22" 26" 32" 42" 55" 65" 70"

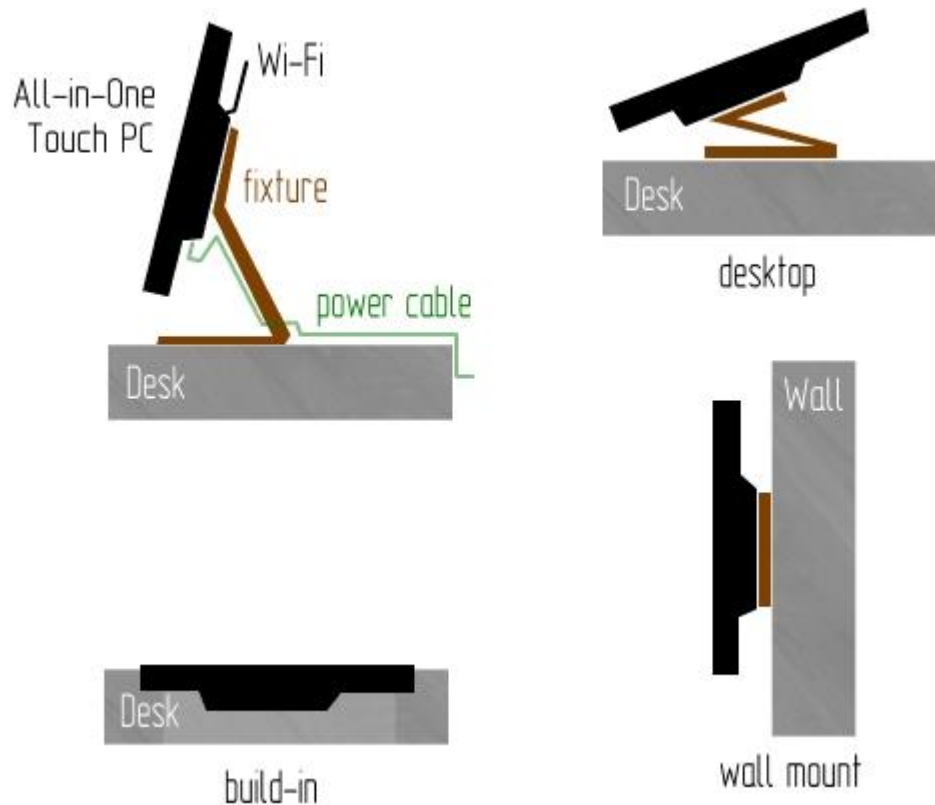

- Strong Aluminium Case
- Touch screen
- Intel Atom / Core i3 / i5 CPU
